

Pathways To Learning

A Multi-Sensory Approach

Handwriting Tutoring and Assessment

Handwriting Without Tears

** The #1 choice for OT's and educators who are asked to facilitate handwriting remediation.

HWT uses a multi-sensory approach to handwriting which makes learning fun. Tutoring available for ages 5 and up, teaching both print and cursive.

Winner of the 2008 AEP award for Best Reading and Language Instruction Books.

The Print Tool Assessment

** Analyzes HWT, D'Nealian and Zaner-Bloser through the use of curriculum analyses.

** Assesses the 8 essential components of handwriting.

** 2009 AEP award winner.

Pathways To Learning

A Multi-Sensory Approach

Interactive Metronome

IM is a research based tool used with children and adults of all ages and abilities. It is used to enhance your brains mental timing and processing, focus, concentration and attention to tasks. IM also increases your multi-tasking and organization skills. Areas of improvement have been seen in visual and auditory processing, sensory integration and sports performance.

Fit Brains Learn Better

** "The Interactive Metronome is spectacularly helpful. It is one of the most promising developments with non-medication of ADHD that's come in a long while." -Edward Hallowell, MD
